where aviation history comes alive

Set in the heart of the West Sussex countryside just three miles from Chichester, the Museum contains a wealth of exhibits.

See items covering Tangmere's first days during WW1, its crucial role as a front line fighter station in WW2, its involvement in clandestine 'Black Lysander' operations, its period as home to the RAF's High Speed Flight which captured the world airspeed record, and more, much more...

so much to see...

...fifteen important aircraft including two holders of the World Airspeed record plus countless fascinating artefacts spread over five display halls...

...and do

...a jet cockpit you can sit in, flight simulators you can try your hand at, interactive touch-screen displays, major SOE and WAAF displays, models, medals... the list goes on.
